

LITE KEG

Lightweight: Utilizes polypropylene chimes to reduce overall weight.

Cost-effective: Provides a reliable, economic alternative to full stainless steel kegs.

Ergonomic: Improved ergonomic grip for ease of handling with an ingeniously designed stacking system.

Secure: Neck and body constructed from 1.4301 stainless steel, ensuring strength and corrosion resistance.

A NEW GENERATION OF LIGHTWEIGHT KEGS WITH POLYPROPYLENE CHIMES

EASY TO HANDLE, READY TO ROLL

THIELMANN's re-designed Lite Keg is a lightweight and cost-effective option for brewers and beverage makers. It's designed for efficiency and ease of handling.

Crafted from robust 304 stainless steel, the keg's body and neck ensure exceptional performance and corrosion resistance, fully safeguarding the integrity of its contents. By cleverly combining a stainless steel body with polypropylene chimes, the Lite Keg achieves a substantial reduction in weight. The 10-liter model is also available in 316 or Duplex stainless steel, combining superior corrosion resistance with our trusted slimline design.

But that's not all. The Lite Keg's comfortable, ergonomic grip makes handling effortless, while its fully stackable design offers a remarkable space-saving solution, maximizing your storage capacity. Its surfaces are meticulously pickled and passivated, meeting stringent food-grade standards to ensure it's ready to deliver your beverages in pristine condition. Customization options, including colored chimes and a polished finish, are available on request.

Choose the Lite Keg for unparalleled performance, safety, and lightweight handling. Engineered by expertise you can trust.

ADVANTAGES

- Reduced weight and ergonomic grip for easier handling.
- Fully stackable.
- Built-in safety burst disc to prevent over-pressurization.
- 100% leak tested and pressure tested at 5 bar.
- Impact-resistant chimes are designed to withstand drops from various angles.
- Stainless steel and polymer materials are traceable through batch documentation and inspection certificates.
- Chimes are securely attached with a snap-fit mechanism.
- The top chime includes a housing for RFID (LF and/or UHF) smart tracking tags.
- Option for a polished finish.
- Custom chime color available upon request.
- Available in 10L and 20L volumes, crafted from 304 stainless steel.
- The 10-liter Lite Keg is also available in 316 or Duplex stainless steel. Ask your sales representative for minimum order quantity.
