<b>PLACE:</b>	Granada, Spain	<b>REPORTING TO:</b>	Head of Process Engineering

# AUTOMATION ENGINEER.

We are looking for an experienced Automation Engineer to join our team! As an Automation Engineer, you will be responsible for designing and testing automated machinery and processes in order to complete exact tasks.

## RESPONSABILITIES.

- Research and implementation of new ways to automate systems.
- Designing and testing automation equipment and processes.
- Developing, programming and designing new automation technologies and processes to improve efficiency.
- Designing control systems for industrial machines and equipment, such as robots or manufacturing systems.
- Testing new equipment designs or process changes to ensure they meet safety standards and specifications.
- Simulating and testing automated machinery and methods.
- Identifying opportunities for automation within software processes.
- Running tests for databases, systems, networks and applications.
- Identify quality issues and writing reports.
- Eliminating defects and errors with product and software development.
- Collaborating with other business units.

## YOUR PROFILE.

- Bachelor's Degree in electrical engineering, mechanical engineering, mechatronics, or similar field.
- Proficiency in maintaining automation equipment.
- Experience with robotics and project management.
- Solid understanding of computer programming and software development.
- Ability to troubleshoot equipment and perform complex system tests.
- Ability to keep up with the latest technologies.
- A desire to continually upgrade technical knowledge.

- Several years of relevant professional experience in the automation of industrial applications and mechatronics areas.
- Basic understanding of the operation of IT related to production (hardware, operating systems, network technology and application programs).
- Spanish, English C1 level is a must and German is a plus.
- Availability to travel internationally.

### YOUR SOFT SKILLS.

- Advanced level in Microsoft Office.
- Independence, customer orientation, structured thinking, and ability to deal with complex problems, incorporate issues, and organize.
- Strong leadership and problem-solving skills.
- Excellent organizational skills and attention to detail.
- Creative thinking skills.
- Excellent verbal and written communication skills.
- Strong analytical skills.
- Well-versed with working in a multi-cultural environment
- Continuous improvement mindset.

### WHATS IN OFFER FOR YOU...

The opportunity to working in a truly global, fast-growing company that dares to dream big. You will be involved in a number of exciting transformational projects and interact with the Senior Management team on a regular basis. You will get the chance to grow, developer your career – and most importantly – have FUN!
